

ENVIRONMENTAL POLICY

Sharp Electronics (Europe) GmbH, Sharp Electronics (Nordic) AB, Sharp Electronics (Schweiz) AG and Sharp Electronics (UK) Ltd. are subsidiaries of Sharp Corporation selling electronic products in European countries. In addition to quality, economic business and social responsibilities, the protection of our natural environment is an equally ambitious objective to us.

We commit ourselves to continuously reduce the environmental impacts of activities arising from our locations and to contribute to Sharp products being environmentally friendly. We consider legal requirements as a minimum and strive to surpass them by far. Special interest is put in reducing energy and resources consumption.

Through new, energy saving products and with the sales of solar modules, we wish to contribute to global reduction of CO₂ emissions.

We have established an Environmental Management System which is continuously improved. We verify the realisation of our environmental policy and environmental programme regularly, with corrective measures being carried out. Environment Protection is considered on all major decisions.

We constantly inform the Sharp production sites about present and future environmental requirements relating to Sharp products and participate in the implementation of producer responsibility in particular. Wherever Sharp products are offered, we aspire to the adequate handling of products at the end of their lifecycle and thus to closing the material cycle. We advise the users about environmentally friendly handling of our products.

Open-mindedness to environment protection is promoted amongst all Sharp employees.

For environment protection, we will continuously seek an open and creative dialogue with the public, our partners and neighbours. With the sense of our goal

**" Creating an Environmentally Advanced Company
with Sincerity and Creativity "**,

we will inform about our environmental programme as well as accomplishments of our environmental targets.

Hamburg, March 2009

Toshiyuki Tajima

Chief Executive Officer of all European Sales Subsidiaries
President of European Headquarters
Managing Director of Sharp Electronics (Europe) GmbH
